3. Fly Crosswind over Hwy 125
4. Fly Downwind over First Valley
5. Traffic Pattern 1200'
6. At 1200' Reduce RPM's to 2300 or less

Gillespie Field is a busy general aviation airfield that supports numerous aviation businesses and the local economy. Voluntary noise abatement procedures for Gillespie were established many years ago. The program has several components, some which are directed at reducing noise through pilot education and others intended to raise the awareness of the residents about the existence of the airport. The Good Neighbor Program exists within the voluntary noise abatement program as an effort to educate both the airport users and the community as to the issues and concerns.

Below is the voluntary noise abatement program:

- Discourage touch and go operations 10pm to 7am
- Discourage jet operations 10pm to 7am
- Encourage training operations at other County airports
- Encourage touch and go operations on Runway 27R when able
- Runway 17 preferred noise abatement departure when tower closed
